#### 1. Population Needs

##### 1.1 National/local context and evidence base

From April 2013 the non-medical prescribing methods of charging and coding had to change. Previous coding to the GP practice for community nurses was no longer possible. Nurses had to be either registered as Practice Nurses to a dedicated practice code or to GP Practice or hosted by their employing organisation.

NHS Dorset CCG agreed a temporary arrangement of dummy practice codes of NMPDDorset and NMPB&P. During 2013/14 discussions took place with the Provider to rationalise and validate NMP lists. The process is now complete and the responsibility for the budget as well as the governance arrangements are now transferred to the Provider.
